<b>Re:</b> Cedar Island Forest Products Ltd.	<b>File No.:</b> AQ-10-01--1185

We have reviewed the Environmental Protection Notice (EPN), and

confirm that the EPN has been circulated through all appropriate departments within the municipality for comment, and that any comments/concerns arising from this review are listed below.

have comments/concerns as follows:

- Sufficient information has not been shared with the City and the community to respond to this notice of application from Cedar Island Forest Products Ltd.
- Below are some of the concerns residents have expressed to the City, and to City council members, regarding emissions from the Cedar Island Forest Products Ltd. mill:
  - The mill is located adjacent to a medium-density residential area which poses a direct risk to elderly residents and children;
  - There are severe health effects from the particulate matter that the mill emits;
  - Sawdust accumulates in nearby yards and houses, including lawns, decks, and kitchens;
  - Residents are actively not using yards and gardens because of the dust and health implications posed; and
  - Residents have experienced noticeable impacts on kids with asthma.
- Overall, the dust generated from the mill has severely impacted residents' quality of life for years.
- The City does not support any additional emissions beyond the existing emissions levels.

the following would satisfy our concerns:

We request the full permit application by Cedar Island Forest Products Ltd. be shared with the City and community and that an extension to the comment period be granted to accommodate a thorough review of the full permit application from Cedar Island Forest Products Ltd.

<b>Would you like a copy of the final permit?</b> <input checked="" type="checkbox"/> Yes <input type="checkbox"/> No
