Hello,
I have been reading about the upcoming budget proposal.
I noticed there will be overall increases, which as most taxpayers,
I'm not a fan of continual increases.
We should not be considered the Bank of taxpayers, that government can routinely visit to withdraw upon.

One area, I noticed was the public E CHARGING stations in New Westminster.
If I understood correctly, **one can charge their vehicle for 1 hour for \$2.00??**
This price seems way too low, considering it usually takes 1 hour to fully charge the average vehicle.
Considering the cost to fill a gas powered vehicle, is approximately \$70.00-\$100.00.
I propose that the city increase EV charging stations, instead of increasing residential electricity.

Regards,
C. Carlson
