Dear Mr. Webster

**Subject: Furness & Duncan Street Crossing Warning System Review
M.P. 0.80 Queensborough Spur**

After performing a site visit to conduct measurements and observations and after reviewing the design plans and photographs of remedied deficiencies that were outlined in the design review report, Hatch finds the crossing warning system in compliance with the relevant sections of the Transport Canada's Grade Crossing Standards (GCS). In addition, Hatch finds that the crossing meets the requirements for whistle cessation

Yours faithfully,

Peter Bohmert, P.Eng.
