

Attachment 6

Electric Utility Fees and Rates Review Memo

MEMORANDUM

Electrical Utility

To: Shehzad Somji
CFO

Date: August 14, 2024

From: Marc Rutishauser
Deputy Director of Electrical Services

File: 2543752

Subject: Electrical Fees and Rates Review – 2025

This memo serves as a summary of the electrical service charges to be implemented in 2025.

The Utility has long aimed at maintaining fees that are in line with local industry rates. The proposed 2025 rates have incorporated a 3% increase due to inflation. Additionally, AMI radio-off fees have been added to the bylaw.

Electric Vehicle charging rates have been reviewed by the Climate Action team; no changes are proposed at this time.

The Utility Commission will be reviewing the proposed changes at its September 3rd regular meeting.

Marc Rutishauser
Deputy Director of Electrical Services
